Using technology to drive growth?
It takes #HumanChemistry

FULL CHEMICAL NAME
Alkoxides

NaOCH₃
KOH

DID YOU KNOW...
Evonik is the world’s leading producer of alkoxides for the production of biodiesel.

DID YOU KNOW...
Evonik’s alkoxides play an important role in the synthesis of active pharmaceutical ingredients that cure millions of people.

DID YOU KNOW...
Alkoxides from Evonik are used in the production of omega-3 fish oil concentrates.

APPLICATIONS...
Commercial synthesis of sealants, adhesives for constructional applications, catalyst in light-emitting materials, in fragrances and flavors, for the synthesis of active ingredients in pharma and healthcare, and as a catalyst for polymer applications in packaging.
